

StormWind Epic Live Delivered Content:

About Us:

StormWind is a professional IT training company that brings a live, Hollywood-HD quality experience to the world of e-learning. Using proprietary technology, we create and deliver interactive online training that is truly personal and engaging. Whether joining a class in a live real-time remote setting, or joining at your own pace and on your own schedule, StormWind offers a wide variety of next generation eLearning environments. StormWind is unparalleled in the marketplace in our offerings, services, and approach to ensuring our clients' return on their training investments.

Our Unique Approach:

LIVE Virtual Classes: The StormWind training solution is very unique compared to traditional IT learning methods. Our methodology “bridges the gap” between traditional web-based training and traditional classroom-based training. The StormWind model allows the student to join a live virtual class as often as it runs, and as many times as they wish, over the course of 12 months. As opposed to a traditional “boot-camp” course whereby the student is attending their course for 8 hours a day over multiple days, StormWind typically delivers each live class over the course of two weeks, Monday – Thursday, for two hours each day (with a few exceptions). The content being covered over this timeframe is “apples-to-apples” with any traditional out-of-office boot-camp course and covers the content from both a certification and professional development perspective, depending on the goals of each student.

OnDemand available 24x7x365: each student has immediate access to the “On-Demand” version of their course. The On-Demand course will always reflect the previous live event that last occurred and will be updated throughout the year to ensure the content is always up-to-date. Over the course of the year, the On-Demand course will capture any changes or additions to content that may have occurred.

Live Virtual Labs and Resources available 24x7x365: each student has immediate access to many resources you would typically find in a traditional out-of-office bootcamp course. Live Virtual Labs, dynamic practice exams, books/guides, and mentoring support direct with our instructors are always there for the student to ensure they are getting everything out of their class that they can.

Front-End Reporting: To ensure maximum efficacy, StormWind's clients now have the ability to pull activity reports in real-time utilizing our front-end reporting feature. This allows our clients to achieve maximum ROI on their training investment.
