

# Take control of your screens

Engage audiences with digital signage and empower administrators with device management. All from one central place.

## Engage and inspire with digital signage

Keep students and parents informed with class schedules and school news. Create a sense of community by sharing images and videos from school performances and sporting events.

## Efficient, remote maintenance for administrators

Empower your IT department to manage screens and projectors more effectively with real-time, remote access to Airtame-enabled devices. Change settings and conduct updates en masse. Delegate control based on rank, location and use case.

## Reduced environmental footprint

Save on your energy bill while saving the planet by scheduling screens to turn on and off according to school hours.

## Security for complex networks

SSL encryption for secure communication between Airtame devices and Airtame Cloud.
